

Adjustable Height Personal Space Heater

This space heater is designed for household use. It features a circular heating element protected by a metal grill, mounted on an adjustable-height stand.

Overview

Compact Personal Heating Solution

This adjustable personal space heater provides efficient, localized warmth for indoor environments. Featuring dual power settings and a flexible design with adjustable height and pitch, it allows users to direct heat exactly where it is needed. Safety is prioritized through a high-temperature resistant mesh enclosure with a protective flocking finish.
