

Adjustable Height Radiant Electric Heater

This radiant heater provides warmth with a carbon fiber heating element and adjustable height up to 116cm. It includes a 60-minute timer, 90-degree oscillation, and tip-over protection for safety.

Product Overview

Professional Radiant Heating Solution

This adjustable height radiant electric heater is engineered for efficient indoor climate control. Featuring a circular heating element with a protective safety grill and high-efficiency reflector, it provides targeted warmth. The unit is mounted on a height-adjustable stand with a weighted base to ensure stability and safety in professional environments.
