

Adjustable Height Radiant Heater

This is a standing radiant heater designed for indoor use. The height of the heater is adjustable via a telescopic pole.

Product Overview

Efficient Comfort Solutions

This adjustable height radiant heater provides versatile heating solutions for indoor environments with a power range of 500W to 1000W. Featuring advanced ceramic heating technology and wide-angle oscillation, it ensures even warmth distribution within a 3-meter range. Designed for user safety and convenience, it includes automatic tip-over protection, overheat prevention, and an integrated timer for flexible operation.

Technical Specifications

Heating Power

500 W

Low Mode

1000 W

High Mode

Heating Technology	Ceramic
Timer Function	2 hours
Heat Coverage Range	3 meters

Design & Build

Adjustability Options

- Bending head
- Lifting head
- Height adjustable body

Housing Material	ABS
Power Cord Length	1.5 M

Safety & Features

Safety Certifications	Tip-over switch, Overheat protection
