Product Overview

Versatile Adjustable Hole Cutter

This adjustable hole saw cutter is designed for drilling precise circular holes in various materials, including wood, plywood, and gypsum board. It features a central pilot drill bit for accurate centering and adjustable cutting blades that allow for variable hole diameters. Built for stability and consistent performance, this tool is an essential addition for woodworking, electrical installations, and professional projects.

Technical Specifications

Adjustable Diameter Range

- 60
- 80
- 100
- 120

Compatible Materials

Wood, Plywood, Gypsum Board, Plastic

Certifications

Quality Standards

ISO 9001
