

Adjustable Hook Wrench 304 Stainless Steel Non-Magnetic

This adjustable hook wrench is constructed from 304 stainless steel. Its non-magnetic properties and hook design ensure secure gripping and turning for various components.

Product Overview

High-Performance Adjustable Hook Wrench

This adjustable hook wrench is crafted from premium 304 stainless steel, engineered for environments where magnetic interference must be avoided. It maintains structural integrity and toughness across extreme temperature ranges, from -250°C to 600°C. Designed for precision and durability, this tool is an environmentally friendly choice, free from radiation and pollution.

Technical Specifications

Magnetic Properties

Non-Magnetic

Size Range

135-438 mm

Material

304 Stainless Steel

Performance Metrics

Temperature Resistance

600 °C

Max Temperature

-250 °C

Min Temperature
