

# Adjustable Inclined Plane Stability Tester

This device is designed for stability testing of appliances based on IEC60335 standards. The apparatus features an adjustable plane that can be inclined at various angles to assess stability.

## Overview

### Stability Testing Capability

The Adjustable Inclined Plane Stability Tester is a precision apparatus designed to assess the stability of electric appliances used on tables or floors. By simulating inclined surfaces, it helps determine if an apparatus remains stable during operation, effectively identifying potential tipping hazards. This device is essential for ensuring compliance with international safety standards for a wide range of electrical equipment.

## Technical Specifications

### Key Features

- Adjustable angle mechanism (0-15°)
- Sturdy tripod base for stability
- Integrated leveling instrument
- Designed for table and floor appliances

<b>Inclination Angle Range</b>	15 degrees
<b>Compliance Standards</b>	IEC 60065, IEC 60335-1, IEC 60601-1, IEC 60950, EN 60335-1, EN 60950, VDE 0700, VDE 0730, VDE 0805
