

# Adjustable Industrial Blower Fan

This adjustable industrial blower fan is designed for high-velocity air circulation. It features a robust metal construction with an adjustable stand for precise directional airflow.

## ADDITIONAL IMAGES

## Overview

### Portable Industrial Ventilation Solution

This adjustable industrial blower is designed for high-performance air circulation in demanding environments. Featuring a robust, portable design with a protective metal cage, it offers stable capacity and high wind pressure for effective supply and exhaust. It is ideal for maintenance tasks, shipbuilding, underground engineering, and chemical industrial applications.

## Technical Specifications

Model	SHT-25
Diameter	250 mm
Power Consumption	320 W
Voltage/Frequency	220/240V, 50/60Hz

## Performance Metrics

### Key Performance Metrics

**2800 r/min**  
Speed (50Hz)

**3300 r/min**  
Speed (60Hz)

**43 m<sup>3</sup>/min**  
Air Delivery

**294 Pa**  
Wind Pressure

## Features

### Product Advantages

- Portable and lightweight design
- One-piece safety switch under handle
- Protective metal cage
- Adjustable stand for directional airflow
- High wind rate and pressure

## Applications

### Common Applications

Communication Cable Maintenance, Ship Building, Ship Repairing, Municipal Underground Engineering, Chemical Industrial Factory, Large Capacity Tank Container
