

Adjustable Jaw Water Pump Pliers

These water pump pliers are designed for gripping and turning pipes, nuts, and other oddly shaped items. The adjustable jaws allow for use on various sizes.

Product Overview

Professional Versatility

These adjustable jaw water pump pliers are engineered for professional gripping and turning tasks involving pipes, nuts, and irregularly shaped components. The design integrates hardened steel teeth to ensure a secure, slip-resistant hold on heavy-duty applications. With adjustable jaw settings and ergonomic handle grips, these pliers offer superior control and reduced hand fatigue during extended use.

Technical Specifications
