

Adjustable Locking Pliers with Quick Release

These locking pliers are designed for secure gripping and clamping. They feature adjustable jaw opening, hardened steel construction, and ergonomic handles.

Product Overview

Professional Grade Locking Pliers

These high-quality locking pliers are engineered for secure gripping and clamping in demanding environments. Featuring durable hardened steel construction and a quick-release mechanism, they ensure efficient operation for professional tasks. The adjustable jaw opening and knurled screw allow for precise pressure control, making them an essential tool for welding, automotive repairs, and general maintenance.
