

Adjustable Metal Bracket Assembly with Threaded Rod and Expansion Anchor

This adjustable metal bracket assembly features a threaded rod, expansion anchor, nuts, and washers. It is suitable for various construction and support applications requiring adjustability.

Product Overview

Adjustable Metal Bracket Assembly

This versatile bracket assembly is designed for reliable structural support in industrial and commercial environments. It features a high-quality threaded rod paired with an expansion anchor, ensuring secure mounting and adjustable positioning. Constructed from corrosion-resistant material, the assembly provides long-term durability and stability for diverse mechanical fastening applications.

Technical Specifications

Components

- Slotted metal bracket
- Hole-design metal bracket
- Threaded rod
- Expansion anchor
- Locking nuts
- Washers

Design Features

Adjustable • Slotted Design • Threaded

Material Composition

Stainless Steel, Corrosion-Resistant
