

Adjustable Multi-Range Timer

This multi-range timer is designed for industrial and automation applications. It features a clear dial and indicator lights for setting time delays and displaying operational status.

Overview

Precision Timing Control

The AH3-NB is a versatile multi-range timer engineered for demanding industrial and automation environments. Designed to provide flexible control, it features an adjustable timing range and selectable modes to suit various operational requirements. Its robust construction ensures reliable, consistent performance for equipment and process management where precise timing is critical.

Technical Specifications

Model	AH3-NB
Voltage Rating	220 VAC
Timer Type	Multi-Range Timer

Features

Key Features

- Adjustable timing ranges
- Selectable timing modes
- Operational status indicator lights
- Clear dial for time delay setting
- Robust industrial construction

Application Suitability	Industrial Automation, Process Control, Equipment Timing
