

Adjustable Nozzle Spray Gun

This spray gun is designed for various coating applications. Its adjustable nozzle customizes spray patterns and flow, ensuring optimal coverage and minimal waste.

Product Overview

Professional Performance and Precision

The MZ-472 spray gun is a versatile tool designed for a variety of coating applications, including paints, lacquers, and various surface treatments. It features a robust, ergonomic construction that ensures comfortable handling and precise control during intensive industrial use. The adjustable nozzle allows for effortless customization of spray patterns and flow rates, providing optimal coverage while minimizing material waste.

Technical Specifications

Key Features

- Ergonomic handle for comfort
- Adjustable nozzle for spray pattern control
- Durable, industrial-grade components
- Optimized for minimal material waste

User Compatibility

Professional Grade • DIY Friendly

Suitable Applications

Paints, Lacquers, Surface Treatments
