

Adjustable Parabolic Space Heater

This parabolic heater offers three heating power options: 450W and 900W. It has an adjustable head and wide-angle oscillation for broad heat distribution.

Product Overview

Efficient Directional Heating

This adjustable parabolic space heater is designed for targeted, efficient indoor heating. Featuring a circular infrared heating element protected by a durable metal grill, it provides focused warmth exactly where you need it. The unit includes an adjustable tilt mechanism and intuitive control knobs, making it a versatile solution for personal comfort in various indoor environments.
