

Adjustable Pattern Impact Sprinkler Head

This impact sprinkler head is engineered for efficient irrigation. It features adjustable spray patterns and distance control and is suitable for various applications.

Product Overview

Adjustable Pattern Impact Sprinkler

The 20PYS2 impact sprinkler is a high-performance irrigation solution designed for uniform water distribution across agricultural and commercial landscapes. It features a robust 1-inch inlet and adjustable spray patterns, allowing for precise control over coverage area and distance. This model is engineered for reliability, ensuring optimal plant health and efficient water usage in diverse environments.

Technical Specifications

Inlet Size	1 inch
Nozzle Diameter	6 * 3 mm
