

Adjustable Pipe Hanger with Mounting Plate

This loop hanger fastener is designed for suspending pipes or tubes from overhead structures. It features a galvanized steel construction for corrosion resistance and durability.

Product Overview

Professional Adjustable Pipe Hanger

This adjustable pipe hanger with a mounting plate is engineered for reliable suspension of pipes and tubes in overhead installations. Constructed from durable galvanized steel, it offers excellent corrosion resistance for long-term industrial use. The design includes a U-shaped strap and a threaded rod system, allowing for precise vertical adjustment to meet specific installation requirements.

Technical Specifications

Material & Finish	Galvanized Steel
Corrosion Resistance	Yes
Adjustment Mechanism	Threaded rod for vertical adjustment

Applications

Compatible Surfaces

- Ceilings
- Beams
- Overhead structures

Suitable Industries	Plumbing, HVAC, Industrial Piping
