

Adjustable Roller Lever Limit Switch

This limit switch has an adjustable roller lever, suiting it for various actuation needs. It is designed to monitor and control the position of moving parts in machinery.

Product Overview

Precision Industrial Limit Switch

This adjustable roller lever limit switch is engineered for high-precision travel detection in demanding industrial environments. Designed for versatility, its adjustable lever allows for precise actuation in monitoring moving machinery parts. With robust construction and reliable performance, it ensures consistent operation while providing essential protection against dust and water ingress.
