

Adjustable Solar Panel Torch Flashlight

This is a versatile lighting device that combines a torch and a flashlight. It features multiple adjustable solar panels for optimal sunlight capture.

Product Overview

Versatile Solar-Powered Lighting Solution

This innovative lighting device combines the functionality of a torch and flashlight into a single, compact unit designed for maximum energy efficiency. It features a unique triple-panel configuration, allowing for optimal solar energy capture through adjustable articulation. Built for versatility and portability, this device is ideal for professional applications requiring reliable, sustainable light sources.

Design and Mechanics

Solar Panel Array	Triple Panel Design, Adjustable, Articulated
Panel Adjustment Angle	120 degrees

Key Features

Energy Source
Solar Powered

Operating Modes

- Torch Mode
- Flashlight Mode
