Product Overview

Industrial Spring Balancer

This industrial-grade spring tool balancer is designed to compensate for the weight of hand tools, pneumatic, hydraulic, and electric equipment. By suspending heavy tools, it significantly improves workplace ergonomics, reduces operator fatigue, and helps prevent repetitive strain injuries. Its compact and durable aluminum body ensures flexible placement and long-lasting performance in demanding manufacturing environments.

Technical Specifications

Capacity Range

0.5 kg Minimum Capacity	400 kg Maximum Capacity
-----------------------------------	-----------------------------------

Wire Rope Length

2.8 m

Housing Material

Aluminum

Features

Key Advantages

- Adjustable tension mechanism
- Durable, lightweight aluminum construction
- Reduces workplace injury risks
- Consistent and efficient tool placement
- Protects tools from damage

Applications

Common Industry Applications

Welding Stations, Assembly Lines, Pneumatic Tool Support, Hydraulic Tool Support, Electric Tool Support
