

# Adjustable Suspension Seat for Industrial Vehicles

This heavy-duty suspension seat is designed for optimal comfort and support in industrial machinery applications. The robust suspension system effectively absorbs shocks and vibrations, reducing operator fatigue.

## Overview

### Industrial Comfort Solutions

This heavy-duty suspension seat is engineered to provide superior operator comfort and physical support in demanding industrial environments. Featuring a robust shock-absorption system, it significantly reduces fatigue for users operating machinery for extended periods. The ergonomic design incorporates multiple adjustment points to ensure a personalized fit for diverse operators.

## Ergonomics

### Adjustment Features

- Adjustable lumbar support
- Adjustable armrests
- Adjustable headrest
- Adjustable height
- Fore/aft slide adjustment

## Compatibility

### Suitable Applications

Forklifts, Tractors, Construction Equipment, Industrial Vehicles

## Key Metrics

### Model Identifier

SC15-9

## Features

### Performance Benefits

Shock Absorption • Vibration Reduction • Ergonomic Contoured Cushion • Heavy-Duty Construction
