

Adjustable Telescopic Ceiling Support Prop

Adjustable ceiling support prop designed for temporary support during construction or repair work. It features a telescopic pole with a top plate for secure attachment and a hook at the bottom for suspending objects.

Product Overview

Professional Ceiling Support Solution

This adjustable telescopic ceiling support prop is engineered for temporary structural support during construction, renovation, or repair projects. Featuring a robust metal construction, it provides reliable stability for ceilings, walls, and structural elements. The precise telescopic mechanism allows for easy height adjustment, while the integrated top plate and bottom hook ensure secure attachment and versatile utility on the job site.
