

Adjustable Temperature Hair Straightener

This professional hair straightener features adjustable temperature settings from 120°C to 200°C. It is equipped with a swivel cord and ergonomic handle for comfortable styling.

Product Overview

Professional Styling Performance

This adjustable temperature hair straightener is designed for professional styling, featuring high-quality ceramic coating plates that ensure even heat distribution for smooth results. With five distinct temperature levels, it offers precise heat control suitable for various hair types. Safety and convenience are prioritized through features like a 30-minute auto shut-off function, a lockable handle for storage, and a 360-degree swivel cord for tangle-free operation.
