

Adjustable Temperature Heat Gun for Various Applications

This heat gun is a versatile tool for paint removal, shrink wrapping, and loosening rusted bolts. It features adjustable temperature settings and a built-in stand for hands-free operation.

Overview

Versatile Thermal Solution

The LP-HG01 1500W Dual Temperature Heat Gun is a robust, multi-purpose tool designed for demanding professional tasks. Whether you need to strip paint, thaw frozen pipes, or loosen rusted mechanical components, this device offers precise control with dual heat settings. Its ergonomic, single-handed design ensures ease of use in diverse environments, from workshops to on-site maintenance.

Technical Specifications

Performance Metrics

1500 W Max Power	495 °C Max Temperature	230 V Voltage
----------------------------	----------------------------------	-------------------------

Operating Modes

- Low Temperature (750W / 375°C)
- High Temperature (1500W / 495°C)
- Off

Features

Design Highlights

Single-hand operation • 3-position rocker switch • Ergonomic design

Key Applications

Paint Stripping, Adhesive Removal, Pipe Thawing, Loosening Rusted Bolts, Epoxy Drying, Charcoal Lighting
