Product Overview

Professional Grade Tensioning Solutions

These adjustable turnbuckles are engineered for critical tensioning of cables, ropes, and tie rods across rigging, construction, and marine environments. Featuring durable construction from carbon and stainless steel, they provide precise length and tension control for structural stability. With versatile end configurations, these heavy-duty components offer reliable performance for demanding industrial applications.

Technical Specifications

End Configurations

- Clevis/Jaw
- Eye
- Hook

Related Hardware

- Wire Rope Clips
- Wire Rope Clamps
- Splice Couplings

Material Options

Carbon Steel, Stainless Steel, Galvanized Steel

Application Areas

Rigging, Construction, Marine Environments, Cable Tensioning, Structural Tie Rods
