

Adjustable Time Delay Relay with Rotary Dial

This adjustable time delay relay is designed for industrial and commercial applications. It features a rotary dial for precise time setting and indicator lights for operational status.

Overview

Adjustable Time Delay Relay

The AH2-Y/N is a versatile adjustable time delay relay engineered for industrial and commercial control systems. It features a user-friendly rotary dial for precise time setting, allowing for accurate adjustment of delay periods to meet specific operational requirements. Equipped with clear indicator lights, it provides immediate visual confirmation of status, making it an essential component for automation systems and control panels.

Technical Specifications

Model Number	AH2-Y/N
Adjustment Method	Rotary Dial
Status Indicators	Yes

Applications

Typical Applications

- Automation Systems
- Control Panels
- Electrical Equipment
- Time-based Switching
