

# Adjustable Tripod Microphone Stand with Boom Arm

This adjustable tripod microphone stand is designed for optimal stability and versatile positioning. The height is easily adjustable via a central locking mechanism, allowing for customized positioning to suit various performance or recording environments.

## Overview

### Professional Stability and Versatility

This adjustable tripod microphone stand is engineered for optimal stability and versatile positioning in professional environments. Featuring durable steel construction, the stand provides a secure base with tripod legs capped by non-slip rubber feet. The included boom arm allows for extended reach and precise microphone placement, making it an ideal solution for studio recordings, stage performances, and podcasts.

## Construction & Design

Material	Steel
Base Type	Tripod
Key Features	Adjustable Height, Boom Arm Included, Non-slip Rubber Feet, Central Locking Mechanism
