Product Overview

Professional Irrigation Solution

This adjustable tripod rotary sprinkler is engineered for reliable, even water distribution across lawns, gardens, and diverse landscape environments. Constructed from durable zinc alloy and high-grade components, it offers excellent corrosion resistance for long-term outdoor performance. The telescopic tripod design allows for precise height adjustments, ensuring optimal coverage for various plant heights and terrain types.

Technical Specifications

Minimum Height	55 cm
Maximum Height	88 cm
Primary Materials	Zinc Alloy, Metal, Plastic
