

Adjustable Tube Cutter

This adjustable tube cutter provides clean and efficient cuts on various tubing materials. The telescopic design allows users to adjust the cutting capacity for different tube sizes.

Product Overview

Professional Telescopic Tube Cutter

This heavy-duty telescopic tube cutter is engineered for high-performance cutting on copper, aluminum, brass, and thin-walled stainless steel tubing. Featuring a robust design for faster rolling and precision alignment, it ensures clean, consistent cuts every time. The tool's adjustable telescopic mechanism and ergonomic grip make it an essential solution for demanding plumbing and HVAC applications.

Technical Specifications

Cutting Capacity

6 mm

Minimum Diameter

42 mm

Maximum Diameter

Supported Materials

Copper, Aluminum, Brass, Thin-walled Stainless Steel

Design Features

Key Features

- Heavy-duty construction
- Telescopic adjustment mechanism
- High-quality steel cutting wheel
- Ergonomic handle for pressure control
- Adjustable rollers for tube alignment

Build Quality

Heavy Duty • Precision Engineered
