Product Overview

Reliable Hose Security

These adjustable worm gear hose clamps are engineered for securing hoses, pipes, and tubes across a variety of demanding environments. Featuring a robust worm gear mechanism, they allow for precise adjustment and ensure a tight, leak-proof seal. Constructed from high-quality stainless steel, these clamps offer superior resistance to corrosion and rust, providing long-lasting performance for automotive, plumbing, and industrial applications.

Technical Specifications

Ideal Applications

- Automotive
- Plumbing
- Industrial Equipment

Key Features

Corrosion Resistant • Rust Resistant • Adjustable Diameter • Leak-proof Seal

Mechanism Type	Worm Gear
Material	Stainless Steel
