Overview

Efficient Urban Commuting

This adult folding electric scooter is engineered for reliable city transportation, featuring a robust steel and aluminum frame with a unique wood deck design. It balances performance and safety with a 350W motor, triple braking system, and anti-skid honeycomb tires that eliminate the risk of flat tires. Designed for the modern commuter, it includes smart app connectivity and a foldable structure for convenient storage.

Performance & Power

350W
Brushless high performance motor

8.5 inch
Anti-skid anti-vibration automotive grade vacuum tire

The strongest shock absorption.
Easy through speed bumps
and uneven pavement.

Speed bump

Uneven pavement

Climbing slope

350W brushless motor with shock-absorbing vacuum tires.

Key Performance Metrics
