

Advanced SL 0 Road Bicycle

This high-performance road bicycle is designed for competitive cycling and demanding riders. The Advanced SL-Grade Composite frame provides exceptional stiffness-to-weight ratio for efficient power transfer and responsive handling.

Overview

Professional Performance Road Bicycle

This high-performance road bicycle is engineered for competitive cycling and demanding enthusiasts. It features an advanced composite frame designed for an exceptional stiffness-to-weight ratio, ensuring efficient power transfer and highly responsive handling. The build incorporates top-tier electronic shifting and aerodynamic carbon components, making it an ideal choice for climbers, sprinters, and endurance riders who require a distinct competitive advantage.
