Product Overview

Reliable Medical Power Solution

This high-capacity replacement battery is specifically engineered for use with AED defibrillators, providing the critical backup power required for life-saving equipment. Designed for swift, error-free insertion, it features multiple contacts to ensure seamless integration. This unit is built to maintain reliability during operation, though it requires strict adherence to maintenance guidelines and specific charging protocols to ensure optimal performance and longevity.

Technical Specifications

Model Number	10N-4000AA
Voltage	12 V
Capacity	4 Ah
Battery Type	Ni-MH AA

Physical Characteristics

Weight	820 g
Dimensions (L x W x H)	196 x 81 x 27 mm
Housing Color	White

Compatibility

Compatible Devices	pic30, pic40, pic50
--------------------	---------------------

Safety & Usage

Handling Precautions

- Charge only in specified quick charger
- Do not directly connect negative and positive terminals
- Do not incinerate
- Avoid dropping or strong physical shocks
- Always maintain backup power availability
