Product Overview

Aerodynamic Performance and Safety

This cycling helmet is engineered for both safety and performance, featuring a streamlined aerodynamic shape that minimizes wind resistance for greater efficiency. Designed with multiple vents, it ensures optimal airflow and cooling to keep riders comfortable during intense activity. The construction includes a durable outer shell paired with a shock-absorbing inner liner to provide robust head protection. With adjustable straps and a customizable fit system, it is an ideal choice for road cycling, mountain biking, and various outdoor activities.

Technical Specifications

Key Features

- Aerodynamic design
- Multiple ventilation vents
- Durable outer shell
- Shock-absorbing inner liner
- Adjustable straps

Recommended Use

Road Cycling • Mountain Biking • Outdoor Activities

Model Numbers

KV-21, BH-106

Minimum Order Quantity

200 PCS
