

Aerospace Fastener Installation and Maintenance Tool Kit

This comprehensive tool kit is designed for aerospace fastener installation and maintenance. The kit includes a hydraulic pump, power units, head assemblies, stem base components, swaging tools, a universal joint, tube cutters, and necessary hardware organized in a fitted case.

Overview

Comprehensive Aerospace Maintenance Solution

This professional-grade tool kit is engineered specifically for the precision installation and maintenance of aerospace fasteners. It features a versatile collection of hydraulic power units, head assemblies, and swaging tools, all organized within a durable, fitted case for secure storage and transport. Designed to meet rigorous industry standards, this kit provides technicians with the essential equipment needed for reliable fastener management.

Power Units

Included Power Units

- Model 9
- Model 15
- Manual 41
- Model 50

Components

Head Assemblies	1/4", 3/8", 1/2"
Head Base Components	1/4", 3/8", 1/2"

Tools & Accessories

Swaging Tool Range	1/8" to 3/16"
Tube Cutter Capacity	1/4" to 5/8"
Universal Joint Type	1000 FM

Equipment Features

Key Features

Hydraulic Pump • Pressure Gauge • Fitted Storage Case • Aerospace Grade
