

AG12/386A Alkaline Button Cell Batteries

These are AG12/386A alkaline button cell batteries. Each 1.55V battery contains no mercury and is suitable for small electronic devices.

Product Overview

Reliable Power for Small Electronics

These AG12/386A alkaline button cell batteries provide a stable 1.55V power supply, making them an ideal choice for a wide range of small electronic devices. Engineered for consistent performance, these cells are mercury-free, ensuring a safer option for both the user and the environment. Their compact design and reliable energy output make them a versatile solution for professional and consumer applications alike.

Technical Specifications

Voltage	1.55 V
Battery Type	Alkaline Button Cell
Compatible Models	AG12, 386A

Safety and Compliance

Eco-friendly Status	Hg 0%
Mercury Free	Yes
