

AGM Deep Cycle Battery

This deep cycle battery utilizes a high-quality AGM separator. It features a sealed, maintenance-free design that eliminates gassing and leakage.

Product Overview

Reliable AGM Deep Cycle Power

This AGM deep cycle battery is engineered for high-performance power storage across a wide range of applications, including solar energy systems, medical equipment, and electric tools. Utilizing advanced Absorbent Glass Mat (AGM) technology, it offers a maintenance-free, leak-proof design that ensures safety and longevity. With a robust operational temperature range and low self-discharge rates, it provides dependable energy delivery for both marine and industrial use.

Key Features

Core Advantages

- High qualified AGM separator for deep cycle application
- No-gassing & no leakage design
- Low self-discharge rate
- High purity raw materials
- Maintenance-free operation

Technical Specifications

Operating Temperature Range	-20°C to 50°C
Typical Applications	UPS, Solar Systems, Wind Energy, Medical Equipment, Electric Tools, Marine Systems, Golf Carts, Wheelchairs

Model Data

Model Specifications

Model	Voltage (V)	Capacity (Ah)	Weight (kg)
SN06100DC	6	100	15.2
SN06120DC	6	120	17.1
SN06150DC	6	150	24.5
SN12250DC	12	250	69
