

AGM VRLA Lead-Acid Battery 12V 65Ah

This AGM VRLA battery features a 12V nominal voltage and a 65Ah capacity for reliable power storage. Its AGM construction ensures no electrolyte leakage and allows installation in multiple orientations.

Product Overview

Reliable Power Storage Solution

This 12V 65Ah VRLA battery utilizes advanced AGM (Absorbent Glass Mat) technology to provide a maintenance-free and dependable power source. Engineered with high-purity raw materials and a durable ABS container, it is designed for a long service life of up to 8 years. Its non-spillable design and oxygen recombination technology make it a safe and efficient choice for critical backup and communication systems.

Technical Specifications

Nominal Voltage	12 V
Nominal Capacity	65 Ah
Design Life	8 years
Technology Type	AGM, VRLA, Maintenance-Free

Construction & Materials

Container Material	ABS
Plate Grid Alloy	PbCaSn

Applications

Primary Applications

- Uninterruptable Power Supply (UPS)
- Network Communication
- Emergency Backup Power
- Alarm and Security Systems

Safety & Handling

Safety Features

Non-spillable • Oxygen Recombination • Recyclable
