

Agricultural and Laboratory Incubator Oven with Digital Temperature Control

This incubator oven is suitable for agricultural or laboratory use. It features a temperature control panel with digital displays and a front door with a circular viewing window.

Product Overview

Precision Environmental Control

This versatile incubator oven is designed for both agricultural and laboratory applications, providing reliable environmental conditions for sensitive processes. It features an intuitive digital temperature control interface, allowing for precise adjustments to meet specific incubation or drying requirements. The robust cabinet design, combined with a convenient viewing window, ensures both durability and ease of monitoring during operation.

Technical Specifications

Ideal Applications

- Agricultural Research
- Laboratory Incubation
- Sample Drying
- Environmental Testing

Control System

Digital Temperature Control

Design Features

Viewing Window, Enclosed Cabinet, Industrial Grade
