

Agricultural Drainage and Irrigation Pump

This pump is designed for agricultural drainage and irrigation systems. It features a robust cast iron construction ensuring durability and long life.

Overview

Professional Agricultural Pump

The RSK-O115 is a high-performance pump engineered specifically for agricultural drainage and irrigation requirements. Built with a robust cast iron construction, it ensures long-term durability in demanding outdoor environments. The system incorporates a precision-machined impeller and sealed bearings to provide reliable, efficient water transfer across various agricultural water sources.

Technical Specifications

Model Identifier	RSK-O115
Material	Cast Iron

Key Features

Engineering Highlights	Precision-machined Impeller, Sealed Bearing System, Corrosion-resistant Coating
------------------------	---

Application

Primary Applications

- Agricultural Drainage
- Irrigation Systems
- General Water Transfer
