

Agricultural Drainage and Irrigation Water Pump

This heavy-duty water pump is designed for agricultural machinery, specifically for drainage and irrigation applications. It features a robust cast iron housing for durability and corrosion resistance, ensuring efficient water flow and reliable performance.

Product Overview

High-Efficiency Agricultural Water Pump

This heavy-duty water pump is engineered specifically for demanding agricultural drainage and irrigation applications. Its robust cast iron housing provides superior durability and long-term corrosion resistance, ensuring reliable operation in harsh field environments. A precision-engineered impeller optimizes water flow, delivering consistent and efficient performance for various water management needs.

Technical Specifications

Core Design Features

- Heavy-duty industrial build
- Corrosion-resistant housing
- Precision-engineered impeller
- High-efficiency flow performance

Housing Material	Cast Iron
Primary Applications	Agricultural Drainage, Irrigation
