

Agricultural Drainage and Irrigation Water Pump

This water pump is designed for agricultural drainage and irrigation applications. It features a robust engine for reliable performance and efficient water transfer.

Product Overview

High-Efficiency Agricultural Water Pump

This industrial-grade water pump is engineered specifically for high-demand agricultural drainage and irrigation tasks. It features a robust, reliable engine designed to maintain consistent performance during long operational hours. The unit provides efficient water transfer from a variety of sources, ensuring your crops receive reliable irrigation or that fields are effectively drained when necessary.

Technical Specifications

Key Features

- Robust engine construction
- High-volume transfer capacity
- Durable housing for field use
- Reliable long-term operation

Model Identifier	WP30CX-B
Core Usage	Agricultural Irrigation, Drainage Systems, Water Transfer
