

Agricultural Drainage Water Pump

This water pump is designed for agricultural drainage and irrigation systems. Its robust construction ensures reliable operation in demanding environments, making it suitable for pumping water from various sources for efficient irrigation.

Product Overview

High-Performance Agricultural Pump

This water pump is specifically engineered for demanding agricultural drainage and irrigation applications. Its robust construction ensures reliable operation across various water sources, facilitating efficient distribution for crop health. Designed with a focus on longevity, the unit minimizes maintenance needs to maximize operational uptime for professional irrigation systems.

Technical Specifications

Key Features

- Robust construction for harsh environments
- Engineered for high longevity
- Low-maintenance design
- High-performance drainage capability

Model Identifier	BM102
Application	Agricultural Irrigation, Field Drainage, Water Distribution
