

Agricultural Drainage Water Pump

This water pump is designed for use in agricultural machinery, specifically for drainage and irrigation systems. It features a robust metallic construction with a flanged mounting surface for secure attachment.

Product Overview

Professional Agricultural Drainage Pump

This high-performance water pump is engineered specifically for demanding agricultural environments, including large-scale irrigation and drainage systems. Built with robust metallic materials, it provides the durability required for continuous duty cycles in field operations. Its integrated flanged mounting design ensures a secure, vibration-resistant connection to existing agricultural machinery.

Technical Specifications

Build Material	Robust metallic alloy
Mounting Style	Flanged mounting surface

Application Details

Key Components

- Impeller shaft
- Hardened pump housing
- Flanged mounting interface

Primary Applications	Agricultural Irrigation, Field Drainage, Machinery Integration
