

Agricultural Irrigation Water Pump

This water pump is designed for drainage and irrigation applications in agriculture. It features a pressure tank for maintaining consistent water pressure and includes a pressure gauge for monitoring performance.

Product Overview

Professional Agricultural Irrigation Solution

This robust water pump is specifically engineered for high-demand agricultural irrigation and drainage applications. Featuring an integrated pressure tank for consistent output and a precision gauge for performance monitoring, it ensures reliable water delivery. Designed with a powerful electric motor, it provides the consistent force necessary for large-scale agricultural operations.

Technical Specifications

Integrated Features

- Integrated pressure tank for consistent flow
- Pressure gauge for real-time monitoring
- High-performance electric motor

Component Design

Red Pressure Tank, Blue Electric Motor

Application & Usage

Primary Applications

Agricultural Irrigation • Field Drainage • Water Management
