

Agricultural Liquid Sprayer

This machine is designed for spraying liquids or other materials in agricultural applications. It features a tank, a pump handle, a control knob, and a nozzle assembly.

Product Overview

Professional Agricultural Liquid Sprayer

This high-performance agricultural liquid sprayer is engineered for precision chemical application and crop maintenance. Featuring a durable tank design and integrated brass components, it ensures consistent flow and reliable operation in demanding field environments. The unit includes an ergonomic pump handle and adjustable controls to provide operators with maximum versatility and ease of use for various liquid spraying tasks.

Technical Specifications

Key Components

- Liquid storage tank
- Manual pump handle
- Precision control knob
- Nozzle assembly
- Brass fittings

Construction Style

Industrial Grade • Corrosion Resistant

Materials

Copper, Brass
