

Agricultural Machinery Bracket Pulley

These bracket pulleys are designed for use in agricultural machinery. They feature robust metal brackets for secure mounting and durable wheels for smooth operation, available in single and double wheel configurations to accommodate different load requirements.

Product Overview

Robust Agricultural Bracket Pulleys

These bracket pulleys are engineered for demanding agricultural machinery and heavy-duty conveyor systems. Featuring robust metal brackets for secure mounting and durable wheels, they ensure reliable and smooth operation under load. The range is available in both single and double wheel configurations to suit diverse equipment requirements.

Technical Specifications

Available Model Numbers

- P4252
- P4353
- P4354
- P4355
- P4356

Configuration Options

Single Wheel, Double Wheel

Application

Suitable Applications

- Agricultural Machinery
- Conveyor Systems
- Heavy-duty Equipment

Design Features

Build Quality

Robust Metal Bracket • Durable Wheel Design
