

Agricultural Machinery Cabin for Harvesters, Sprayers, and Tractors

This cabin is designed for various agricultural machinery including sugarcane harvesters, cotton pickers, boom sprayers, and tractors. It provides a protected and comfortable operating environment for machinery operators.

ADDITIONAL IMAGES

Product Overview

Standard cabin configuration with essential mounting points for agricultural equipment.

Professional Agricultural Machinery Cabin

This high-durability cabin is engineered for a wide range of agricultural machinery including harvesters, tractors, cotton pickers, and boom sprayers. It is designed to provide a safe, comfortable, and protected environment for operators, featuring robust structural integrity and excellent visibility. With a focus on electrical reliability and ergonomic design, these cabins offer a versatile solution to improve operator productivity in demanding agricultural conditions.

Compatibility & Applications

Compatible Machinery

Tractors, Harvesters, Boom Sprayers, Cotton Pickers, Sugarcane Harvesters, Wheat Harvesters, Corn Harvesters

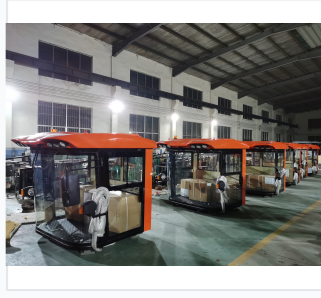

Technical Specifications

Robust frame construction designed for maximum durability and operator visibility.

Ergonomically designed interior space to reduce operator fatigue.

Integrated lighting system for safe operation in low-light conditions.

Weather-resistant enclosure suitable for harsh agricultural environments.

Electrical Systems

- KET imported wiring harness connectors
- Customizable electrical design schemes
- Integrated monitor and LCD display systems
- Advanced meter clusters

Key Features

Reinforced Structure • Enhanced Visibility • Noise Reduction • Vibration Damping • Dust Protection

Available Customizations

- Air conditioning units
- Heating systems
- Advanced control integration
- Custom electrical layouts
