

Agricultural Machinery Gearbox

This heavy-duty agricultural machinery component features a robust housing and dual axle outputs. It is designed for demanding applications in farming and agricultural environments and is likely used for power transmission in tractors, harvesters, or other agricultural vehicles.

Product Overview

Heavy-Duty Agricultural Gearbox

This robust gearbox is engineered for demanding agricultural environments, providing reliable power transmission for heavy machinery. Featuring a durable housing and dual axle outputs, it is designed to withstand harsh operating conditions and high-torque applications. This component is an essential solution for maintaining performance in tractors, harvesters, and other critical agricultural vehicles.

Technical Specifications

Application Suitability

- Tractors
- Harvesters
- Agricultural Vehicles

Component Type	Gearbox / Differential Assembly
Key Design Features	Heavy-Duty, Dual Axle Output, High Torque Capacity
