

Agricultural Pesticide and Fertilizer Sprayer

This plant protection machinery is designed for the efficient application of pesticides, herbicides, and fertilizers in agricultural settings. It features adjustable spray nozzles for precise coverage and a durable frame for reliable performance.

Overview

Efficient Plant Protection

The X-CG410 plant protection machinery is designed for efficient and effective application of pesticides, herbicides, and fertilizers in agricultural settings. This robust machine features a powerful engine and adjustable spray nozzles for precise coverage, ensuring optimal plant protection and maximizing yields. Engineered for durability and ease of maintenance, it provides reliable performance in demanding conditions across various crops and terrains.

Technical Specifications

Key Features

- Powerful engine
- Adjustable spray nozzles
- Durable frame construction

Model Number	X-CG410
Suitable Applications	Pesticides, Herbicides, Fertilizers
