

# Agricultural Reaper Binder

This agricultural reaper binder is designed for efficient reaping and binding of crops. It cuts and securely ties the cut crop into bundles.

## ADDITIONAL IMAGES

## Product Overview

### Professional Harvesting Efficiency

The 4K-50 model is a high-performance agricultural machine engineered for the seamless cutting and automatic binding of diverse crops including rice, wheat, barley, oats, and sesame. Designed for versatility, it features a differential system that allows for effortless turning and spot-spinning, even in challenging field conditions. This robust unit is capable of handling fallen crops and provides a clean, low-stubble cut with an exceptionally high successful binding rate.

## Key Features

### Core Advantages

- Automatic cut and tie mechanism
- Low stubble height with clean cutting
- High-efficiency binding performance
- Differential system for superior maneuverability
- Capable of processing fallen crops

### Crop Suitability

Rice, Wheat, Paddy, Barley, Oat, Sesame

## Operational Details

### Warranty Coverage

**12 months**

Warranty Period

## Trade Terms

### Shipping Information

FOB, shipping via Qingdao port

### Accepted Payment

T/T, L/C at sight
