Product Overview

High-Performance Agricultural Chain Solutions

This sophisticated range of agricultural chains is engineered for the demanding requirements of harvesting and conveying various agricultural products. Designed for durability and reliability, these chains excel in handling diverse crops including coffee, corn, grain, rice, sugar cane, and sunflower. Built with hardened components, they provide extended wear life and consistent performance across heavy-duty agricultural machinery.

Technical Specifications

Available Chain Configurations

- Harvesting Chains
- Feeder Chains
- Elevator Chains
- Gathering Chains
- Transmission Chains
- Conveying Chains

Material Construction

Durable Alloy Steel, Hardened Pins, Hardened Bushings, Hardened Steel Components

Performance Features

Performance Highlights

1993 Year

Manufacturing Experience Since

Application

Compatible Agricultural Products

Coffee • Corn • Grain • Rice • Sugar Cane • Sunflower

Suitable Machinery

- Combine Harvesters
- Balers
- Forage Harvesters
- Conveyors
